

Why statlook?

Scalability and comfort

- No matter how many people manage the data - each of the authorized users can use the system independently of others.
- Floating licenses make it possible to install Master management consoles on any number of computers. The system assigns licenses according to the privileges of administrators.
- Scalability of the system is guaranteed by a three-layer architecture. User interface (Master console), data processing module (server) and database function as independent elements that can work on three separate platforms.

Choose your database

- Paid and free version of a professional Microsoft database or a free, fully functional PostgreSQL database? The choice is yours.
- Paid and free version of a professional Microsoft database or a free, fully functional MS SQL (free version - up to 10GB, paid version - unlimited)
- PostgreSQL (free - unlimited)

Security

- Several levels of security and SSL encryption guarantee security and confidentiality of your data.
- Statlook uses a worldwide standard of data encryption (e.g. AES-256), as well as advanced encryption using a public key (e.g. SSL).

Complexity

- Full functional scope - from professional license audit, through hardware and software management, the Internet and application usage monitoring, to remote helpdesk, removable media control.
- Ready-made procedures, advanced mechanisms and an intuitive interface make your everyday work much easier and allow you to spend the saved time on other urgent tasks.

Experience

- Over 16 years as the leader in the field of Software Asset Management and auditing / 600,000 computers / 7000 clients.
- For over 30 years, we deliver a wide range of advanced IT systems worldwide. Statlook, as our flagship product, is the result of 3 decades of experience and interaction with our Clients and Partners.

manage remotely,
online and
via mobile

statlook® - 3 in 1

Master Console, Mobile Uplink Inventory and Statlook WEB - 3 specialized and synchronized tools included in one system. They provide comfort of work regardless of the equipment used and the place you work.

Comfortable work with user friendly Master Console on desktops and laptops. Statlook WEB optimized for online work. Dedicated applications for mobile systems. One common server and database for all the elements.

- Remote work and remote assistance
- Mobile inventory in the field
- Local, online and mobile helpdesk
- One system - many possibilities

new quality of
personal data
protection

statlook® - Let's GDPR

GDPR Management – Use statlook to perform personal data inventory, check the localizations and their security. Grant access to personal data files for employees and companies. You can also manage the requests for data erasure and security breach notifications.

GDPR Ready – Every statlook module is written in accordance with GDPR rules. The features of the whole system enhance the security personal data in many contexts e.g. hardware (database storage and processing), software (processing data) and users (employees accessing data).

- Personal data inventory and management
- Rational risk and data breach assessment
- Records of processing activities
- Suitable for IT Departments, Processors and Controllers
